WORK EXPERIENCE

Arbor Metagame **Berkeley, CA**
Megagame Chief of Staff September – November 2026
- Project manager for the accelerated-timeline development of a weekend-long ARG-like puzzle hunt
- Tracking prioritization, progress, team onboarding, theme, sponsor integration, and when to tell the very clever artists to sit down, ignore their very cool new ideas, and finish the old ones please.

Constellation **Berkeley, CA**
Contract Software Engineer July 2026 – Present
- July-September: Built talent-tracking system from loose spec to usable Slack/email interfaces, with LLM translation of intent to queries/records across private/public boundaries respecting privacy
- September-Present: Rewrite of program intake forms for fellowships including MATS, Astra, and SPAR, preserving form edit flexibility and hardening base code against large-scale hostile interest

Independent Researcher
Grant-funded June 2026 – Present
- Replication of prompt-based behavior analysis; published analysis warning about incautious design

METR
Contract Software Engineer January 2025, July 2026
- Established baseline tests for programming and code review tasks to test against AI.; rehired 2026.

Luther Systems **Campbell, CA**
Senior Software Engineer November 2021 – January 2023
- Rebuilt cross-chain wrapped-token issuance business logic for improved speed and code legibility.

Assurance IQ (Prudential) **Seattle, WA**
Software Engineer July 2021 – November 2021
- Increased project revenue ~10%, est. >$500,000/yr, by reducing DynamoDB latency 5x on median (0.7s→0.1s) and p90 (5.0s→1.0s) for a critical-path phone-tree customer acquisition flow.

Google, Inc. **Mountain View, CA**
Software Engineer, ChromeOS Test Infrastructure August 2017 – March 2021
- Migrated hardware testing suite to a 1000x-scalable architecture; Maintained the firefighting-heavy legacy architecture throughout the transition without substantial downtime

PROJECTS

Grand Prix jkopczyn.github.io/grand-prix/ *Monaco-based text editor for Google Drive*
- Matched & exceeded features of existing Drive-integrated editors for code and plaintext editing
- Cleared bug backlog of licenseless OSS editor (reference architecture) w/ improved UI & security

Paper Watch github:jkopczyn/paper-watch *Paper reading group intake/classifier*
- Translated manual processes for reading many sources for AI safety-relevant papers into code

EDUCATION

AI Safety BlueDot Technical AI Safety (2026 May-June, seed grant for research)

Reed College **Portland, Oregon**
Bachelor of Arts in Mathematics / Computer Science 2013
- **Relevant Coursework:** Research Topics Seminars in Parallel Processing and Quantum Computing
- Research thesis proved a novel PSPACE-hardness result for the geometric board game Abalone

SKILLS & ACTIVITIES

Go, Python, Linux (Expert) Process optimization, SQL, research, HTML/CSS
Activities: ACM Member, organizer for AI Safety paper reading group and 'art of rationality' meetups
Professional Keywords: Web services, Web development, Agile development, Backend engineering, Technical management, Project management
